UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION I
JOHN F. KENNEDY FEDERAL BUILDING
BOSTON, MASSACHUSETTS 02203-0001

April 5, 1995

Town of Lyndonville
Highway Department
Route 114
Box 167
Lyndonville, VT 05851

To Whom it May Concern:

On June 27, 1986, the United States Environmental Protection Agency (EPA) New England office completed its assessment of the Lyndonville Town Highway Garage property located on Route 114 in Lyndonville, Vermont (EPA Identification Number: VTD981204480). The Agency determined that a "No Further Remedial Action Planned" (NFRAP) decision is appropriate for this site. A search of our files does not show that you, as an owner, operator or other interested party, were ever notified of this decision.

The purpose of this letter is to provide you with formal notification of EPA New England's decision, and to clarify for you a recent change in the EPA policy regarding the "No Further Remedial Action Planned" or NFRAP decision.

The NFRAP decision means that no further work is anticipated at this site by the federal Superfund Site Assessment program. Sites receive a NFRAP decision when the federal Superfund Site Assessment program has completed its assessment of a site, and has determined that, based upon the information available, no further steps will be taken to list a site on the National Priorities List (NPL).

The NFRAP decision does not necessarily mean that there is no hazard associated with this site; it means only that based upon currently available information, this site is not judged to be a potential NPL site. Sites assigned NFRAP decisions are now being removed from EPA's Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) database, and archived as historical records to ensure EPA does not needlessly repeat the investigations in the future.

Further actions may be taken at sites with NFRAP decisions by the Superfund Removal program, other EPA or federal programs, or by state and local programs. You may wish to contact the state to verify the status of your property with regard to state authorities. The contact for the Vermont Department of Environmental Conservation is Chuck Schwer, who may be reached at 802 241-3888.

contains at least 75% recycled fiber

Finally, NFRAP decisions may be changed based upon new information or other considerations which make a recommendation for NPL listing appropriate at a later time. In such an instance, you will be notified and the site will be returned to the CERCLIS database with the NFRAP decision removed.

If you have any questions, I may be reached at 617 573-9697.

Sincerely,

A handwritten signature in cursive script, appearing to read "Don Smith".

Don Smith
